

EDITOR'S FOREWORD

This special issue of *JCSS* is devoted to selected papers that appeared in preliminary form in the Proceedings of the Tenth Annual Structure in Complexity Theory Conference, sponsored by the IEEE Computer Society, and held June 19–22, 1995, at the University of Minnesota, in Minneapolis, Minnesota. The authors of these six papers were invited to submit finished versions of their work, which were then refereed according to the usual standards of *JCSS*.

I acknowledge the assistance of Advisory Editor Alan Selman, as well as the members of the program committee, who participated in the selection of papers. I also thank the authors and anonymous referees who contributed to this special issue.

ERIC ALLENDER
Special Issue Editor
